BOBBY CLARIDAD

DIGITAL MARKETING SPECIALIST | AI AUTOMATION SPECIALIST | KLAVIYO & SHOPIFY | GOHIGHLEVEL

Ampayon, Butuan City, Philippines | claridadbobbyjr@gmail.com | +63 951 879 8280

PROFESSIONAL SUMMARY

Digital marketing and automation professional with 4+ years of experience supporting e-commerce, CRM, and customer acquisition operations. Skilled in Klaviyo, Shopify, GoHighLevel (GHL), and workflow automation using Zapier, Make.com, and n8n. Experienced in connecting business applications through APIs and webhooks, building lead-management workflows, automating customer journeys, and improving day-to-day processes through AI-assisted solutions. Combines marketing execution, e-commerce operations, and technical problem-solving to build connected systems that support business growth.

CORE SKILLS

AI and workflow automation | Zapier | Make.com | n8n | GoHighLevel CRM | API and webhook integrations | REST API connections | CRM pipeline automation | Lead capture, routing, and qualification | Appointment booking and follow-up automation | AI-assisted customer support | Klaviyo flows and campaigns | Email and SMS automation | Segmentation and personalization | Shopify store management | Landing pages and sales funnels | App integration and data synchronization | E-commerce optimization | Campaign strategy and copywriting

PROFESSIONAL EXPERIENCE

Amply Supply | AI Automation & GoHighLevel Specialist | 2025–Present

Remote | CEO: Joemar

- Design and maintain workflow automations using n8n, Make.com, and Zapier to connect business tools and reduce repetitive administrative tasks.
- Configure GoHighLevel CRM pipelines, forms, calendars, triggers, and multi-step workflows for lead capture, assignment, follow-up, and appointment management.
- Connect third-party platforms through REST APIs, webhooks, and native integrations; map fields and synchronize contact, lead, and activity data.
- Build AI-assisted workflows for incoming inquiries, lead categorization, information extraction, and drafting or routing customer responses, with human review where needed.
- Automate notifications, task creation, status updates, and reporting across connected business applications.
- Test workflow paths, conditional logic, error handling, and data accuracy; troubleshoot failed runs and document processes for ongoing maintenance.

The Infused | Klaviyo Specialist | 2025–Present

Remote

- Build, configure, and optimize Klaviyo flows such as welcome series, browse abandonment, cart and checkout abandonment, post-purchase, winback, and customer retention journeys.
- Plan and strategize email campaigns around promotions, product launches, seasonal moments, and customer lifecycle goals.
- Develop campaign calendars and coordinate messaging, timing, audience targeting, and campaign priorities.
- Write conversion-focused email copy, including subject lines, preview text, headlines, body copy, and calls to action.
- Design branded email layouts in Figma and translate creative concepts into email campaigns.
- Integrate and troubleshoot apps and data connections to support customer segmentation, personalization, loyalty messaging, and automated flows.
- Build and refine segments based on engagement, purchase behavior, and customer lifecycle stage.
- Review campaign and flow performance, including deliverability, opens, clicks, conversions, and revenue opportunities, and recommend improvements.
- Support A/B testing, list hygiene, and email best practices to improve engagement and maintain list health.

Hundredfolds | Workflow Automation & CRM Specialist | 2023–2024

Remote | CEO: Jasmine

- Build and optimize GoHighLevel workflows for lead intake, contact management, pipeline updates, appointment reminders, and follow-up sequences.
- Create multi-step automations in Zapier and Make.com to move information between forms, CRMs, spreadsheets, email platforms, and team communication tools.
- Use webhooks and API-based connections to pass data between applications, standardize field mapping, and reduce manual data entry.
- Support AI-enabled workflows for lead qualification, FAQ response assistance, content processing, and routing inquiries to the appropriate team.
- Set up automated email and SMS touchpoints, internal alerts, task assignments, and customer onboarding sequences.
- Perform end-to-end testing, resolve integration issues, and refine workflows based on business requirements and user feedback.

Confident Health | Shopify Store Manager | 2024–2025

Remote

- Build, maintain, and manage Shopify storefronts, including theme configuration, page layouts, navigation, and product pages.
- Manage product listings, collections, pricing, product information, inventory, and merchandising updates.
- Customize Shopify themes and storefront sections to support brand consistency, usability, and conversion goals.
- Manage day-to-day Shopify operations, including app and plugin integrations, store settings, checkout experience, and troubleshooting.
- Support paid advertising and promotional activities to drive qualified traffic, product discovery, and sales.
- Optimize storefront user experience, mobile responsiveness, page speed, and purchase pathways.
- Coordinate marketing assets, landing pages, offers, and product content across store and campaign touchpoints.
- Monitor store performance and identify opportunities to improve product presentation, customer experience, and conversion.

Ecoms Flow Builder Company | Klaviyo Flow Builder | 2023–2024

Remote

- Build and maintain automated email flows in Klaviyo based on customer actions, lifecycle stages, and business objectives.
- Configure triggers, flow filters, conditional splits, time delays, and profile-property logic to deliver relevant messages.
- Set up and troubleshoot app integrations and event syncing so customer and order data can support segmentation and automation.
- Support core flows such as welcome, abandoned cart, checkout abandonment, browse abandonment, post-purchase, and winback.
- Assist with audience segmentation, personalization, dynamic content, and targeted messaging.
- QA flow logic, links, email rendering, and timing before launch; monitor skipped profiles and troubleshoot flow behavior.
- Use campaign and flow performance data to identify opportunities to improve engagement and conversions.

Embeholdings | Shopify Store Manager | 2024–2025

Remote

- Customized Shopify themes and supported storefront development.
- Managed email, referral, and affiliate campaigns.
- Integrated third-party apps and plugins.
- Optimized checkout experience, mobile responsiveness, and site speed.
- Managed social media platforms to improve brand visibility and engagement.

Home Painting Geelong | E-commerce & Digital Marketing Specialist | 2024

Remote

- Managed Shopify stores, product listings, and inventory.
- Created graphics, edited videos, and produced engaging marketing content.
- Ran Facebook ad campaigns to drive traffic and sales.
- Developed and maintained WordPress websites with SEO.
- Managed social media to strengthen brand presence and engagement.

StoneSystem | GoHighLevel (GHL) Expert | 2022–2023

Remote

- Built landing pages and optimized websites.
- Created automation workflows to streamline tasks.
- Managed email marketing campaigns for engagement and conversion.
- Developed lead generation strategies to support sales.

ABresearch | GoHighLevel (GHL) Expert | 2021–2022

Remote

- Set up landing pages, sales funnels, and conversion-focused websites.
- Designed graphics for branding and marketing initiatives.
- Developed lead generation strategies and optimized conversion funnels.
- Integrated third-party tools and automated workflows.

IMTC-Ecom | Virtual Assistant | November 2021

Remote

- Created and optimized product listings with SEO-focused titles, descriptions, and tags.

- Wrote product descriptions aligned with brand voice.
- Maintained inventory levels and product availability.
- Monitored customer reviews and designed product and promotional graphics.

Realtor Web Builder | Web Builder & Social Media Manager | 2019–2020

Remote

- Created social content for Facebook, Instagram, LinkedIn, and TikTok.
- Supported lead generation and created website wireframes.
- Wrote and published blog content on client websites.
- Researched realtor information and organized records in Airtable.

SELECTED AUTOMATION WORK

- **Lead Capture & CRM Pipeline Automation:** Connected website forms and lead sources to GoHighLevel, applied lead tagging and assignment rules, and triggered timely email/SMS follow-ups.
- **Appointment Booking & Reminder Workflows:** Connected calendars and CRM records to automate booking confirmations, reminders, rescheduling updates, and internal notifications.
- **AI-Assisted Inquiry & Lead Qualification:** Used AI prompts and workflow logic to classify incoming inquiries, summarize customer details, and route qualified leads for team follow-up.
- **Cross-Platform API & Webhook Integration:** Connected business applications using REST API requests and webhooks, including field mapping, data synchronization, and workflow testing.
- **E-commerce Customer Lifecycle Automation:** Supported automated customer journeys across Shopify and Klaviyo, including welcome, abandoned cart, post-purchase, retention, and winback communications.
